

DEVELOPMENT & DATAS FOR eHEALTH TOWARDS A DIGITAL HEALTHCARE ENVIRONMENT

October 28th 2013

Giampaolo Armellin

Head of Research Unit at Centro Ricerche GPI

- Is eHealth just a matter of technology?**
- Which kind of “data” to deal with?**
- What about services and organizations?**

Taking care of individuals, enabling effective and efficient services by introducing technology-based assets

Being healthy **even by** using **technologies**

Transition towards a:

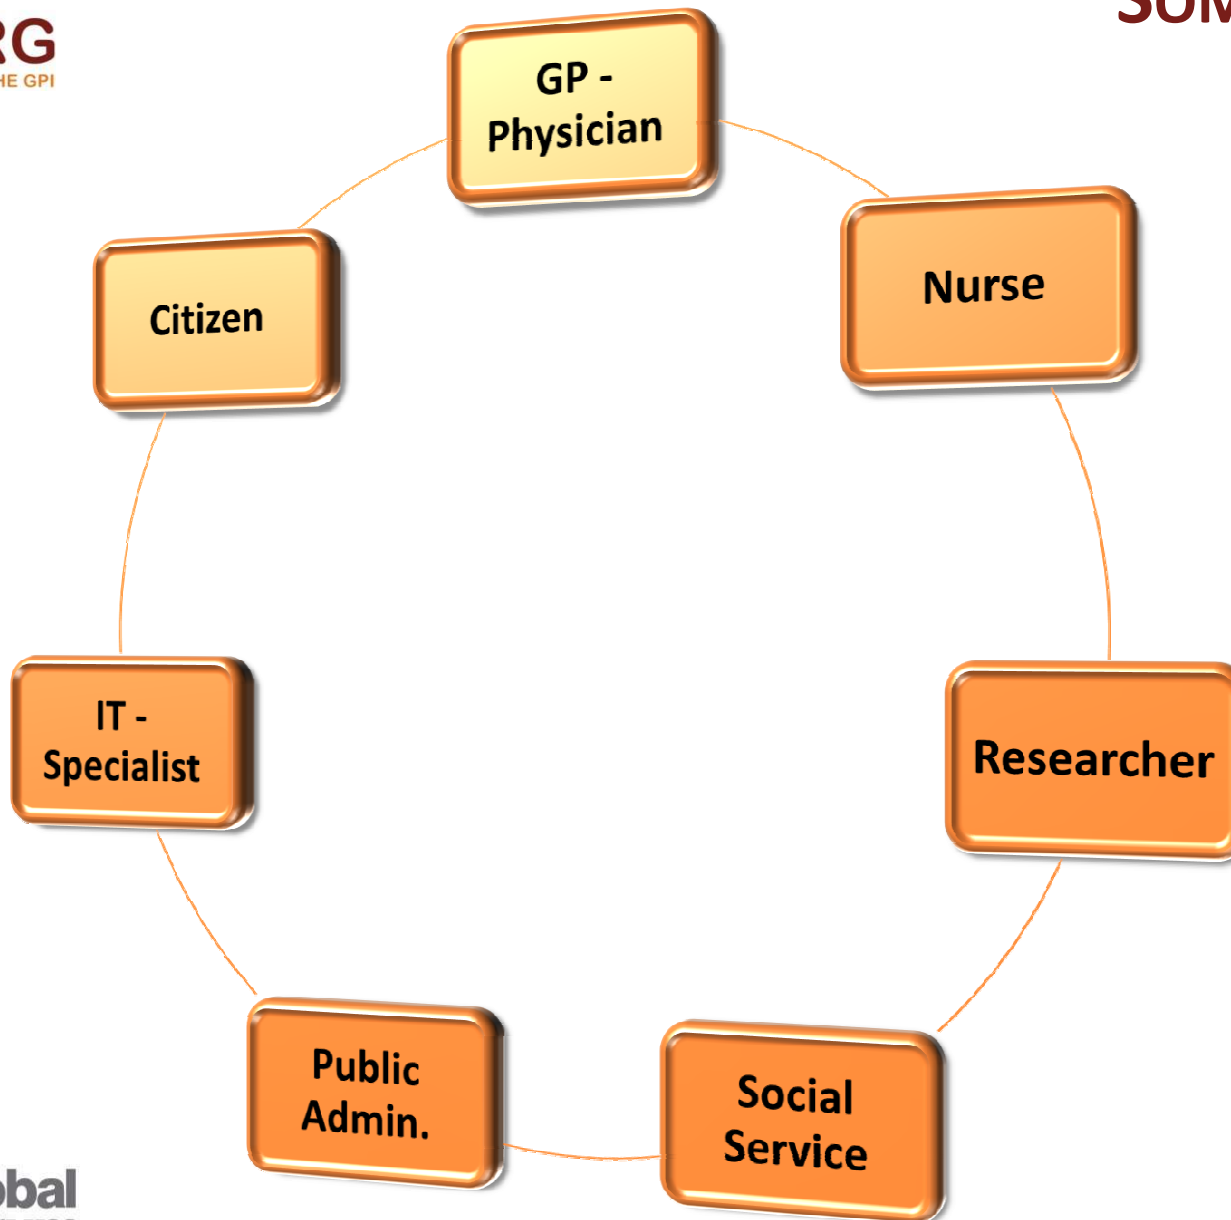

Digital Healthcare Environment

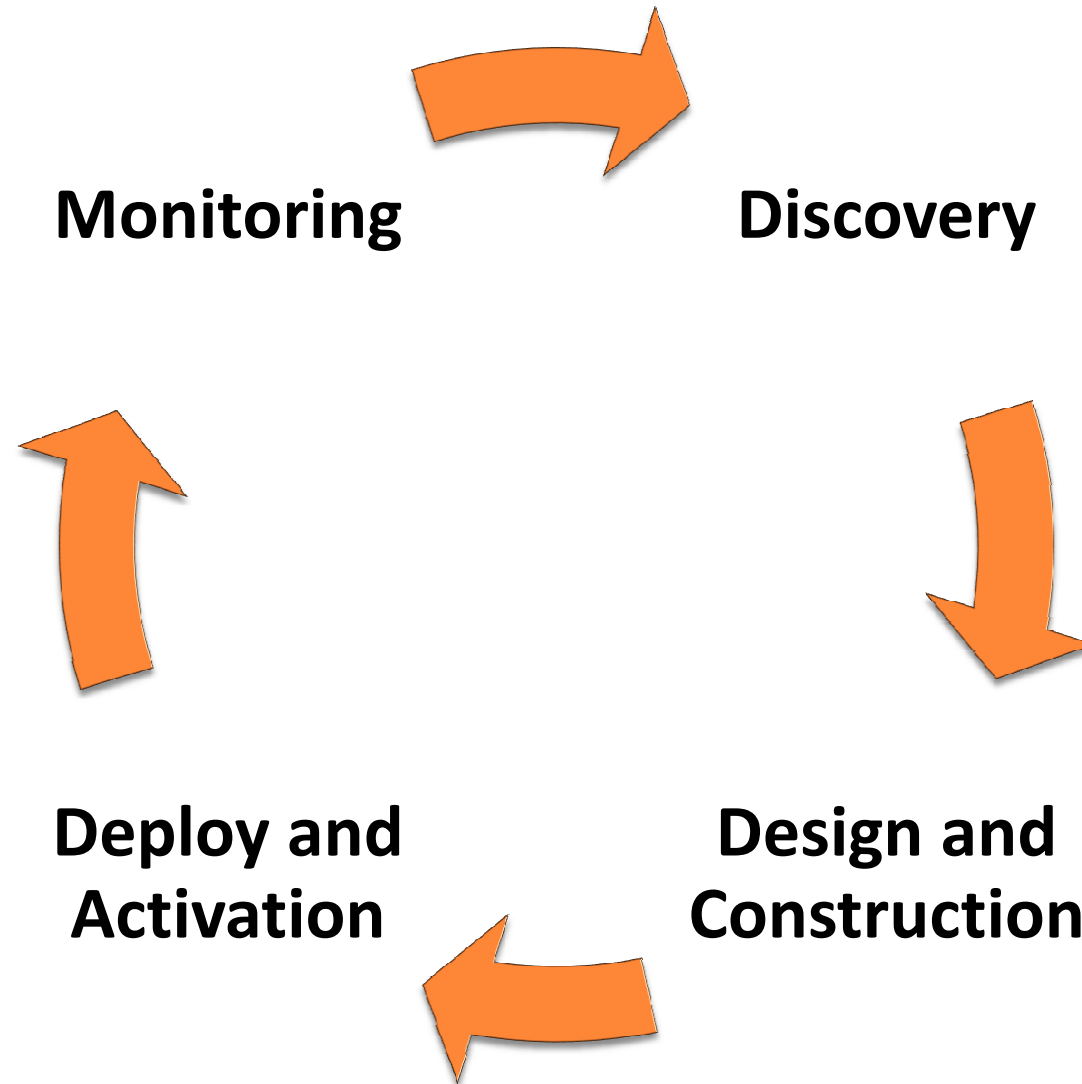

personalization
Needs
services
citizens
healthcare
fulfilled
ample
simply
product
customized

“Personalization” does not mean that a product has to be simply “customized”;
“personalization” means **“making personal”**

SOME ACTORS

PROVISIONING MODEL

MANY THANKS!
