IT make citizen's life better

Radu Enache

CEO, HP Romania

E-Government policies – major challenges

- An effective administration for a more effective business and people activity

- Public institutions get transparent/better inform people and businesses

- Overpass digital divide

Simplifying customers IT experiences

"HP will do everything in our power to help our customers use technology to transform their businesses and make it easier to do what they want to do."
Mark Hurd, Chairman and CEO, Hewlett-Packard

- Optimize IT investments through consolidation and virtualization

- New intelligent, easy to use IT infrastructure

- Networks and business IT based management

- Everything delivered as a service: from computing power to business processes to personal interactions

Empower citizens through HP Technology

- HP invests in education to advance creative uses of technology to help teachers redesign the learning experience and more deeply engage students. In total, HP contributed €35 million in cash and products to advance education, promote entrepreneurship and assist communities in 2008.

- Junior Achievement – Young Enterprise (JA-YE) provides training in entrepreneurship for young people (2.6 mill young people across Europe in 2008,ages 5-22)

- HP's Graduate Entrepreneurship Training through IT (GET-IT) is helping unemployed young people and graduates (16-25 years) acquire the business and IT skills to enter professional life, in many cases launching their own businesses.

Citizenship, education and security

- E-Government solutions from HP offer government authorities and administrations vital services, efficient workflows, and high-level security.
