The evolution of IT technology will bring us to ...

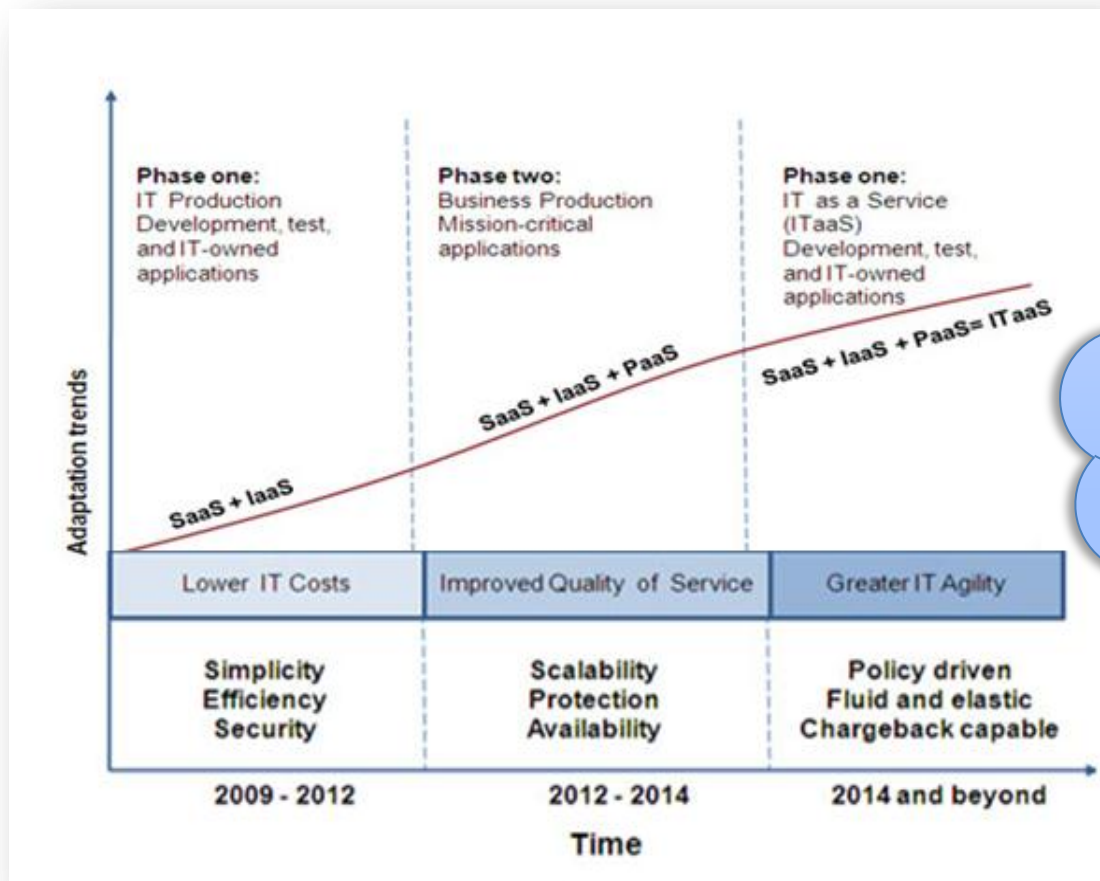

...this?!

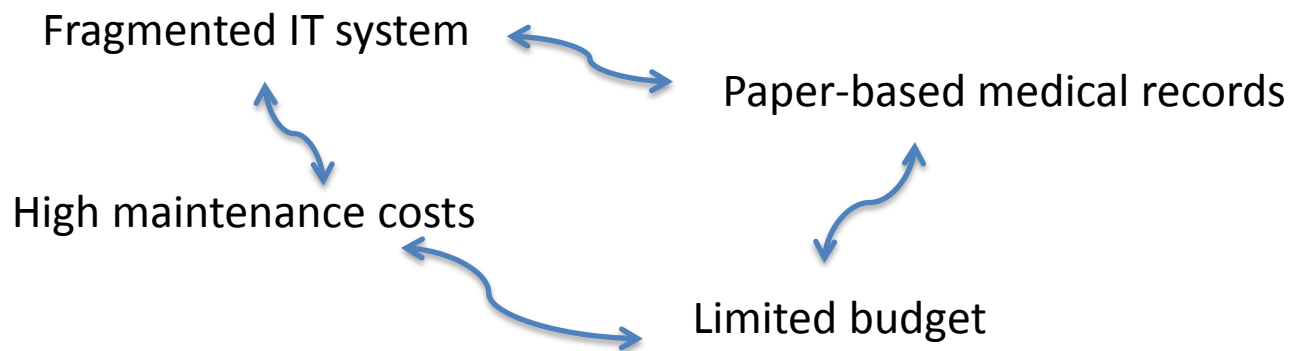

No, it won't...

# Cloud paradigm shift in healthcare

The overall cloud computing market in health care is expected to increase from \$1.8 billion in 2011 to 5.4 billion by 2017

# Why the cloud for ICT health services?

Adopting cloud technologies means taking advantage of innovative applications and freeing IT resources for much needed innovation

# Cloud based Electronic Mobile Records projects

Picarsis, «Picardie système d'information de santé»

Centre Hospitalier Regional Universitaire (CHRU)  
in Montpellier

 **GALILEO iClinic**  
EMR HAS GONE MOBILE

 **GALILEO Dx**  
e-health.solutions

# Cloud based Electronic Mobile Records benefits

**Pervasive access to healthcare information**

**Reducing cost – pay per use**

**Reliability & data security**

**Rapid acquisition and deployment of application**

# Thanks!
