What is platform?

adidas® Adidas Twitter Superstars

This is small project which I was recently working on which brings together Adidas and Twitter. 2006 was the 35th anniversary of the Adidas Superstar and to coincide with that Adidas released a collection of limited edition trainers. Twitter as a brand is increasingly on the rise and I thought it would be interesting to see what it would look like if Adidas also released a limited edition Twitter Superstar, so I worked on my own design of the shoe and this is what I came up with.

01. Colours

The colours used on the shoe are based on the Twitter branding so that it becomes

02. Laces

Coloured laces have been used to give the shoe a more visual lift. White laces on this design may

03. Twitter 'bird' logo

Instead of using the familiar text logo, the 'bird' logo has been used instead as more of a visual element

- Based on the information shared by users new companies use mesh-model to develop their businesses. Among them are:

At the same time we are on the threshold of three new revolutions:

At the end of this decade the number of active internet users may reach 20 billion and among these new users there will be things, not just people.

Widespread usage of cloud computing and SaaS model (software as a service) will result into drastic changes in copyright law because of cybercrime and destructure of trust.

A revolutionary development in nanobioelectronics is coming. It'll be possible to produce computers made of DNA. They will not only reproduce themselves but they will also be biologically comparable with humans.
