Which ubiquitous infrastructure for France ?

"m-Taiwan" project amongst 10 NIPs

alain.ducass@diact.gouv.fr

Mobile-Taiwan, wireless applications, enhance new vision of the world!!

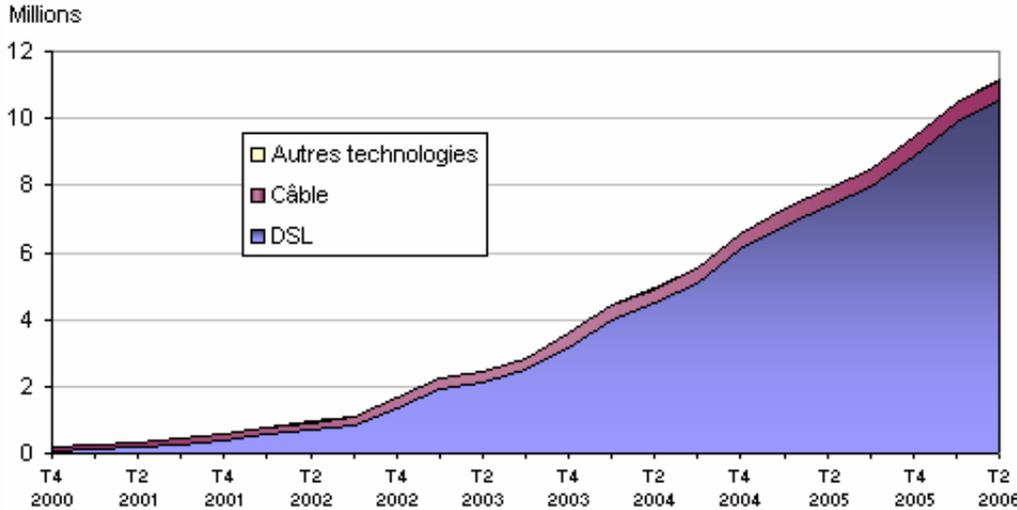

Source: CEPD, Taiwan, 2004/8

The M-Taiwan project hopes to build the world's first iB3G Double Network Integration in Taiwan and create the island's third trillion-dollar telecommunications industry.

2006 : France is now a leading country for broadband in Europe

Abonnements à Internet en accès haut débit

11 million broadband connexions:
10,4 M with DSL
0,6 M with cable,
5000 with other technologies

Ubiquitous society requires

- mobile broadband
- very broadband connexions
- Advanced uses
