

# IT development in Latvia 1990-2004

**GLOBAL**  
**FORUM**  
**2004**  
*Shaping the Future*

NOVEMBER, THURSDAY 4<sup>TH</sup> & FRIDAY 5<sup>TH</sup>, 2004  
MALMÖ – SWEDEN

Dzintars Zarins  
The Association of Computer  
Technologies of Latvia  
Executive Director

## Overview

- Baltic economy in short
- Periods of development
  - 1990-1994
  - 1995-2000
  - 2001-2004
- Success stories
  - MicroLink/Saf
  - Lursoft IT
- Current issues

# Baltic economies

- 7.2 m inhabitants
  - Bigger than Finland, Norway or Denmark
- GDP 36.2 m USD (2003)
  - 22% of Finnish GDP
- GDP per capita 2-2.5 lower than in Nordic countries
- GDP growth 5-9% p.a.
  - Set to continue over coming years
  - The fastest-growing region in EU
- Tight integration with Nordic region
  - Foreign trade equals to GDP
  - Nordic countries are the main trade partners
  - Whole branches of economy are owned by and integrated with Nordic companies
- Liberal economic policies

# Piracy level in the Baltic states

## Years 1990 - 1994

- A lot of companies that distribute IT products and service were established; there was a great margin of hardware products.
- Equipment delivery to governmental and private sector
  - Great "Black" market share
  - Small distribution of legal software
  - Missing of the greatest international whole sellers, great proportion of OEM computers.
- Direct company contact with USA, Taiwan and China
- Telecommunications monopoly, small internet capacity, expensive service

## Years 1990 - 1994

- Software and data base development for governmental and private sector
  - Small proportion of international business and accounting software
  - Many local accounting programmes
- Beginning of international projects and success of a/s SWH Riga in software development; development of:
  - SWH technology, today known as A/S "Exigen Latvia"
  - DATI group

## Years 1995 - 2000

### International whole sellers start work

- Soft-tronik (Elko group) 1992
- Elko Group 1993
- Scribona (ex. Instru Data) 1994
- CHS Rīga (GNT) 1995
- Computer 2000 Latvia (TD ) 1995

### International brand representatives start work

- HP May, 1992
- IBM January, 1992
- SIEMENS Year 1996
- NAVISION Year 1998
- Microsoft April, 1999
- CISCO Year, 2000
- BSA January, 2001
- Oracle September, 2002

## Foundation of the branch associations

- **Association of Computer Technologies of Latvia (LDTA)**, Founded in September, 1997. [www.itnet.lv](http://www.itnet.lv) (members: 17 juridical)
- **Latvian Electronical Engineering and electronics industry association (LETRA)**, Founded in June, 1995 [www.letera.lv](http://www.letera.lv) (members: 45 juridical)
- **Latvian Information Technology and Telecommunications Association (LITTA)**, Founded in November, 1998 [www.litta.lv](http://www.litta.lv) (members: 66 juridical, 150 physical),
- **Internet Association of Latvia (LIA)**, Founded in August, 2000 [www.lia.lv](http://www.lia.lv) (members: 36 members),
- **Latvian Association of Cable Telecommunication Operators (LKOTA)**, Founded in September, 1999
- **Telecommunication Association of Latvia (LTA)**, Founded in December, 1998 [www.lta.lv](http://www.lta.lv) (members: 27 juridical, 11 physical)

## Association of Computer Technologies of Latvia (LDTA),

Founded in September, 1997. [www.itnet.lv](http://www.itnet.lv)

Members: 18 juridical persons: IT whole sellers, IT system integrators, also software developers.

The major goals of LDTA are:

- Representation of the IT industry in the governmental and international institutions
- Support of the beneficial infrastructure of IT development.
- Taking part in educational program elaboration and implementation.
- Realization of basic approaches of Information Society.
- Close cooperation with other associations and state's institutions in order to meet the goals and tasks desired

# ITTE ALLIANCE

On September 12, 2000 the contract is signed between:

- LDТА
- LITTA
- LTA
- LEtERA

Later joined by LTA and LKOTA

## **OBJECTIVES:**

- Exchange of information, work coordination
- Organisation of shared events
- Branch representative for shared interest achievement
- Consensus principle in decision taking

# IT branch peculiarities of the period

- Government increases investments in the IT branch
- The enterprises are restructured and their specification grows
- More computers are sold in supermarkets
- The major IT companies receive ISO 9000 and ISO 9001 quality certificates
- Hardware product profit percentage decreases
- Distribution of illegal software decreases
- The “black market” share decreases
- Investor’ involvement begins, companies unite
- Many companies are re-sold to foreign businesses
- IT industry becomes a leader in developing e-commerce principles

## Year 2001-2004

- The end of telecommunication monopoly (January 1, 2002), the beginning of a fast internet development
- Continues investor interest about Latvian IT companies
- IT branch export increases, especially the one of software products
- Increases whole branch turnover
- IT enterprises actively take part in the development of Information society
- The competition between the local and incoming foreign companies (mainly Lithuanian firms) grows
- IT enterprises agree on development of the branch cluster
- Possibility of taking part in EC financed projects and programmes increases

Latvian enterprise register data base. Information about all Latvian Companies. [www.lursoft.lv](http://www.lursoft.lv)

European Business Register- Easy access to reliable information on companies all over Europe. [www.ebr.lv](http://www.ebr.lv)

Lursoft Newspaper Library- 28 largest Latvian daily and regional newspapers since 1994. [www.news.lv](http://www.news.lv)

SIETS Server is the next generation content based data storage and retrieval system whose main role is to serve as the enterprise search engine. [www.siets.lv](http://www.siets.lv)

## General conclusions for Latvia

- State's investments into IT infrastructure E-government should be implemented faster
- School and education informatization system financing must be continued as well as higher education financing must be increased
- Internet penetration should be enlarged
- Copy right protection must get promoted

## Current issues of LDTA

---

- Levies in a Digital Environment
- Electronic waste management
- Software Patentability
- Internet

## Thank you for your attention!
