

Federated Identity Management as a Managed Service

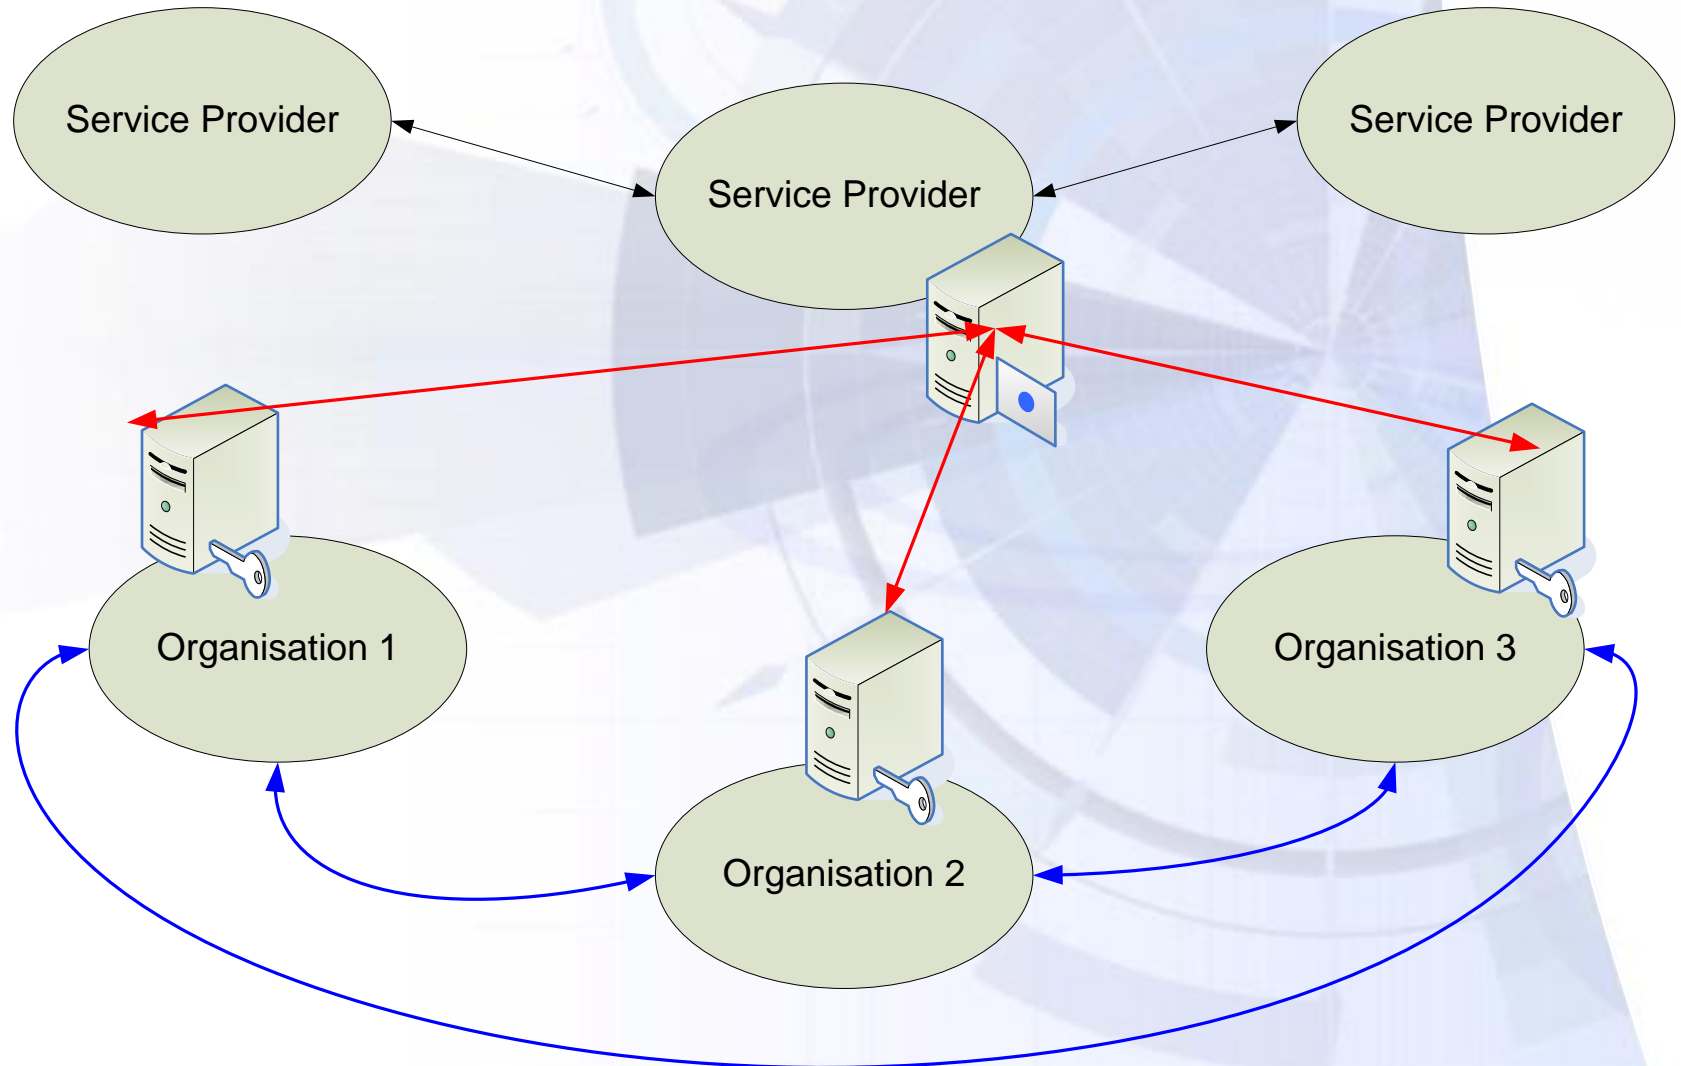

Paddy Francis, 19th October 2009, Global Forum Bucharest

Federated Identity Management ?

Federated Identity Management ?

Benefits of a Managed Service

- Economic
 - No initial Capital Outlay
 - No Need to recruit and retain specialist skills
 - More economic for Small Companies
- Operational
 - Allows communication between different trust areas
 - Management of Export controlled data
 - International Working
 - Supplier / Customer interaction

Service Provision Issues

- **Code of Connection**
 - Using organisations must not be able to compromise the system and must have full trust in the integrity of the system.
- **Levels of Assurance**
 - Different regulations/standards depending on National regulations and type of data (finance, personal, IPR/ITAR)
- **Dependant Services**
 - Secure cloud, remote access (encryption) electronic and physical authentication

Service Provision Issues

- Service Levels
 - Availability of new certificates (registration) and on line verification.
- Independent/bi-lateral/Multi-Partite
 - Trust between users may be at several different levels, Within an organisation, between two organisations “between a group of organisations.
- Non Repudiation
 - Confidence in the provider to correctly verify certificates

Questions?

For every complex problem there is an answer that is clear, simple, and wrong.

H. L. Mencken

Computers are useless. They can only give you answers.

Pablo Picasso

Judge others by their questions rather than by their answers.

Voltaire
