Sweden's innovation
capacity for
sustainable growth

Sweden a leading ICT-nation

- 1885 - Stockholm worlds most telephone dense city in the world
- 1956 - 1st automatic mobile phone system
- 6,3 Million Swedes or 91 percent are connected to Internet in their homes.
- Nine of ten persons use Internet on a regular basis.
- 85 per cent has a broadband connection.
- Between the years 2000 and 2005 estimated 33 per cent of productivity raise in private sector in Sweden could relate to ICT.

Information society– a challenge for the society

- **Integrity** (risk for not permitted controls and surveillance of individuals);
- **Security** (criminal acts, as information leakage, fraud);
- **Accessibility**
- High innovation progress, need of competence, knowledge
- Empowering all industries and sectors
