

A PROMISING SPIN OFF , by AIRBUS

- AIRBUS DS N°2 WW in PMR (Private Mobile Radio Networks)
- Could not find in the market a suitable solution to get reliable electricity for isolated telecom base stations.
- Wanted to explore what was possible in order to avoid diesel generators.
- Developed an innovative solution using advanced li-ion batteries and hydrogen storage and using Renewable Energies .
- Realized that such solution had an enormous potential in wider markets.
- Decided new strategic focus « We make it fly ».
- Initiated a spin off process after having carefully checked viability (technology, market study , seasoned management team).

WHAT DOES POWIDIAN DO : “POWER IN ALL MERIDIANS”

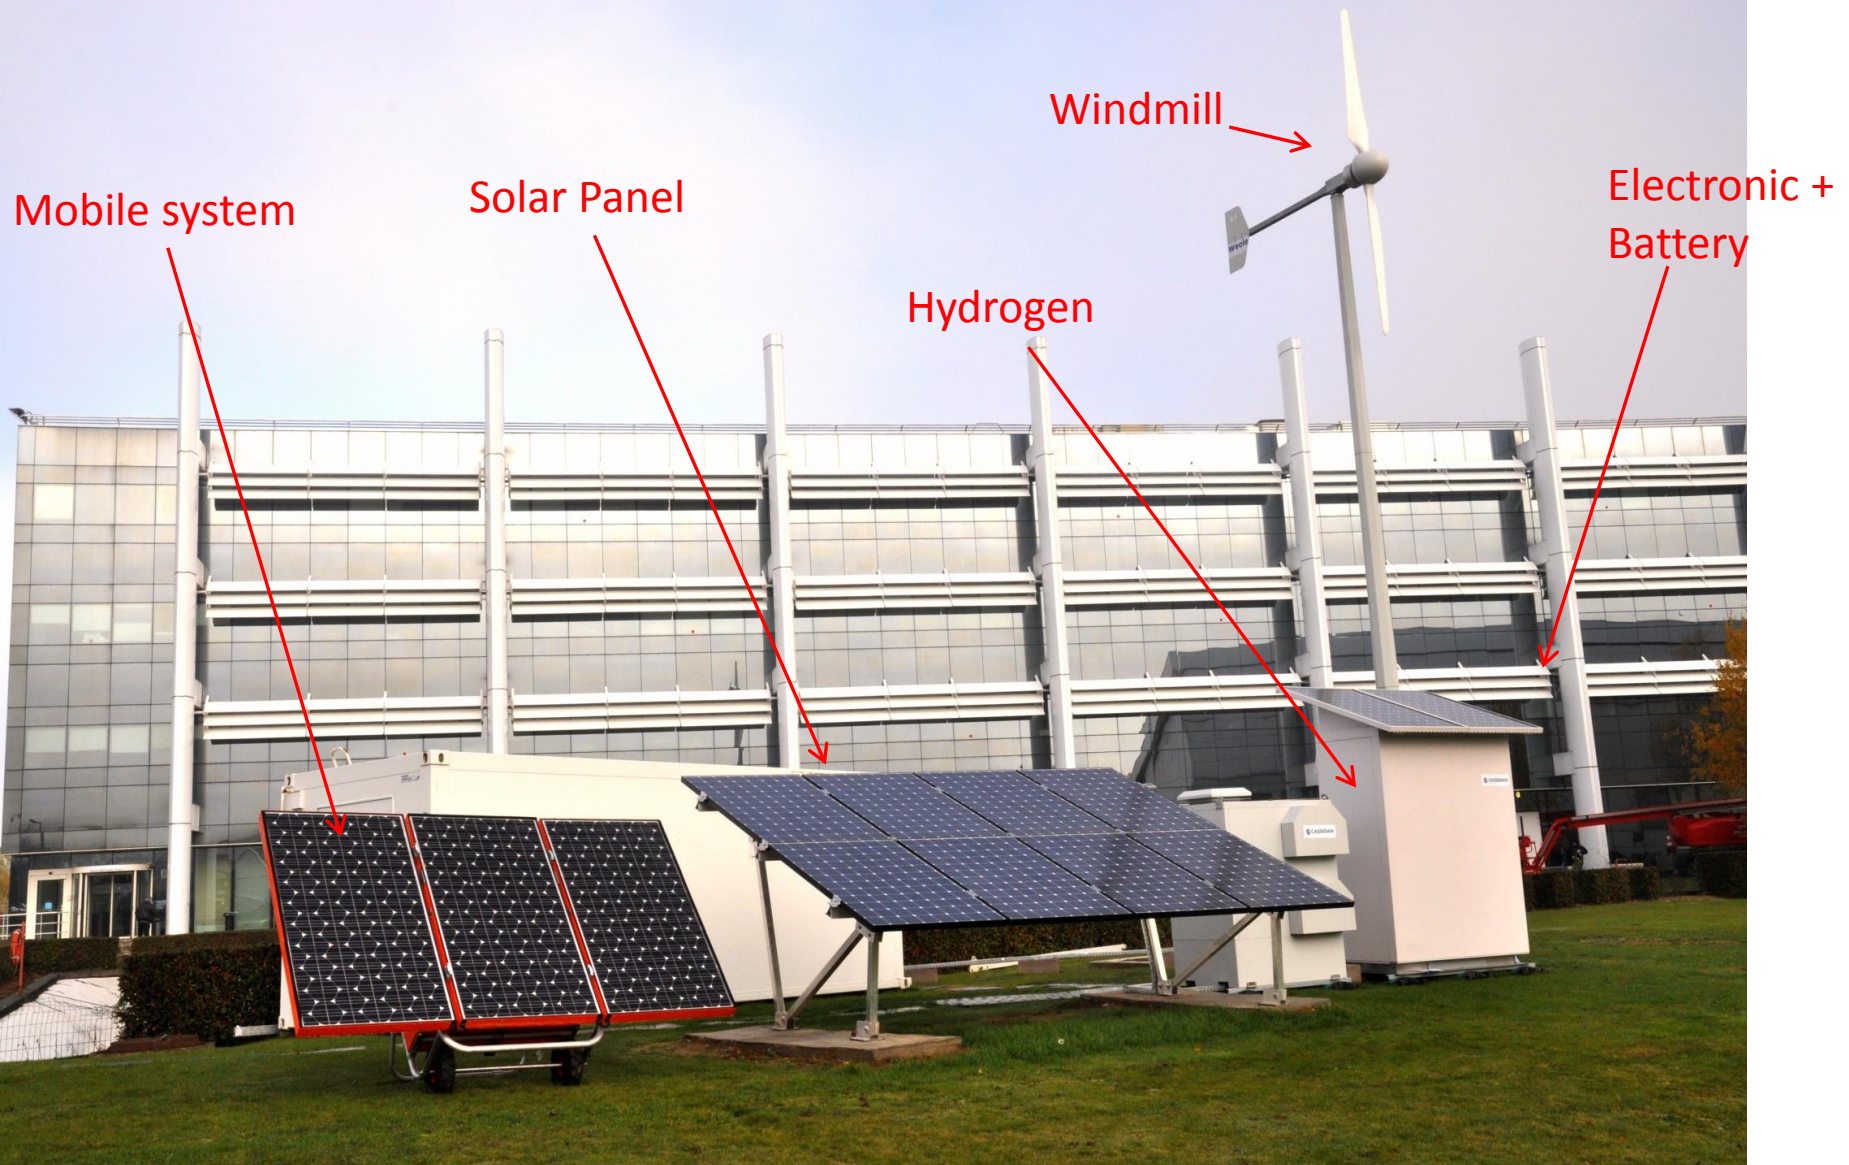

PowiDian

PowiDian designs and sells SAGES (Smart Autonomous Green Energy System) : an intelligent turn-key solution to produce everywhere reliable green electricity using ENR and Hydrogen long term storage.

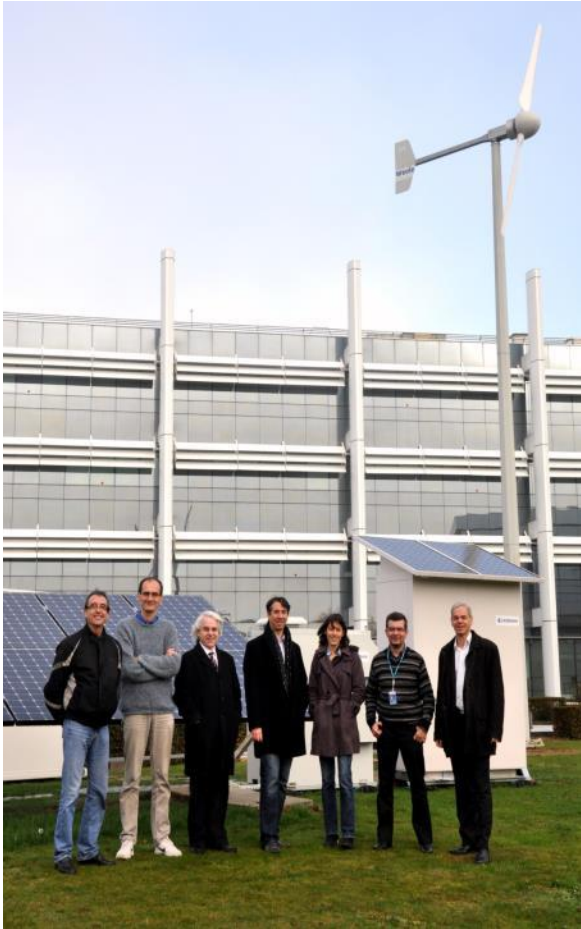

One architecture - Three products : Autonomous, Back up , Mobile

HOW DOES SAGES LOOK LIKE ?

Which ASSETS ARE TRANSFERRED TO POWIDIAN ?

- Market study
- 4 years knowledge
- Validated demonstrator at TRL 6
- Transfer of knowhow (Software, mechanics, chemistry, electronics)
- Free software licences
- WW patents
- Strategic partners in place
- Support to sell and to innovate

| AIRBUS | POWIDIAN | CUSTOMERS AND EUROPE |
|---|---|---|
| Will benefit from products supplied by a pure energy player | Key assets transferred at unbeatable conditions | Both Airbus and PowiDian customers will benefit from innovations |
| Promotes internal entrepreneurial spirit | Airbus backing in finding private investor | PowiDian will create 12 jobs in 2015 |
| Political image | Cooperation with ADS (commercial & technical) | PowiDian may well take a leading role in European Energy transition plans |
