Emancipating, Enriching, Equalising, Empowering through the use of ICTs

COMMONWEALTH TELECOMMUNICATIONS ORGANISATION

#### The Commonwealth Telecommunications Organisation

#### **Cyber & Security: New Challenges in a Global Context**

# **The Commonwealth**

- 53 member countries
- 7 low income countries
- 16 lower middle income countries
- Home to 2.2 billion people
- 60% under the age of 30 - early adapters of technology

**ECOMMUNICATIONS** 

## **Conflicting priorities** – Causes of friction

COMMONWEALTH TELECOMMUNICATION ORGANISATION

Individuals consent to give up a part of their freedom for an assurance of the protection of their rights.

Need the priorities of the two parties to be perfectly aligned

In this instance the right people want protected is the same freedom that is sought to be given up

#### **CTO's observations**

COMMONWEALTH TELECOMMUNICATIONS ORGANISATION

- Privacy and Cybersecurity are usually considered separately
- More Commonwealth countries are working on Cybersecurity than on data protection and privacy
- In national Cyber-policy making, the engagement of civil society is limited
- Even at Global level the engagement of civil society in Cyber-policy making is limited to committed few

## **Future?**

- Increasing demand for greater degree of privacy and control of own data
- Continuous friction between security and liberty; which takes precedence will be determined by the scale of economic development
- Practice of democracy will change due to Cyberspace; vastly increased civil society engagement in the democratic process
- Global Cyber-policy making may not be as broadbased as is required; due to resource, knowledge and commitment constraints
