# CyberSecurity Challenges

- **More & More Connectivity**
  - More users are connecting, not less!
  - Think mobile, web, internet, intranet, even Classified Systems
- **Increasing System Complexity**
  - Applications are getting bigger and more distributed faster than ever!
  - More technologies, languages, interfaces!
- **Risk of External Vendors / 3rd Party Software**
  - Systems are constantly evolving and changing on the fly!
  - More frameworks, plugins, open source software, API's
- **Too Much Reliance on Compliance & Standards**
  - Cybersecurity regulations, rules, audits, etc. are increasing
- **Lack of Experience & Knowledge**
  - Training is required for ALL Job roles

- Hackers are constantly researching for new vulnerabilities and attack vectors
- Attackers have copious time & patience
- We must be proactive – build security in
- We must think like an attacker
- We must be as knowledgeable
