

More Than Code. Practical Solutions.

# Waziup: Open Data Innovation

Ali Kone

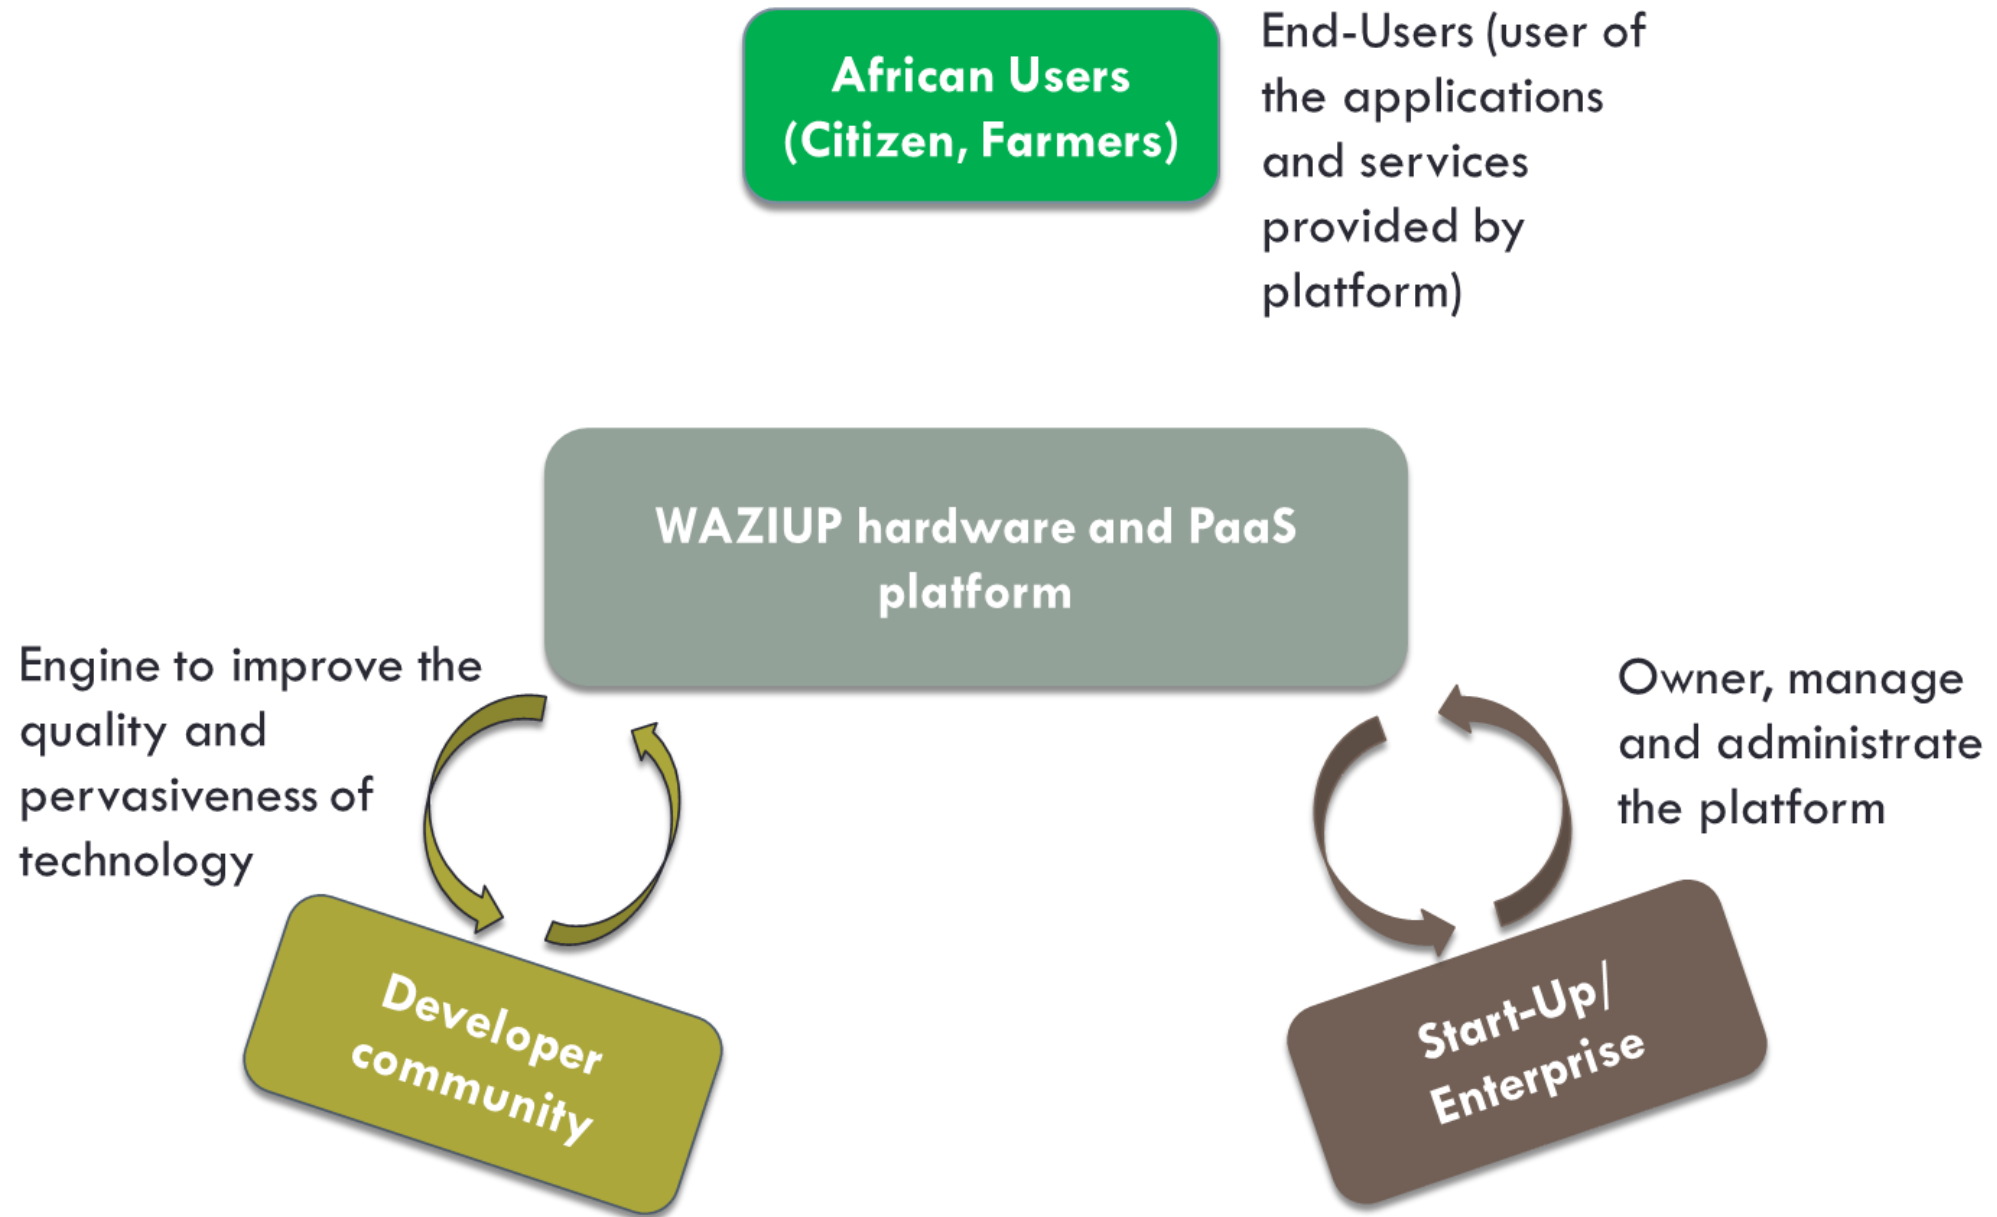

Session 9: Data Revolution

*“The WAZIUP project, namely the Open Innovation Platform for IoT-Big Data in Sub-Saharan Africa is a collaborative research project using cutting edge technology **applying and co-designing IoT and Big Data to improve the working conditions** in the rural ecosystem of Sub-Saharan Africa”*

# Waziup Platform Ecosystem

# End users application types

## □ IoT applications

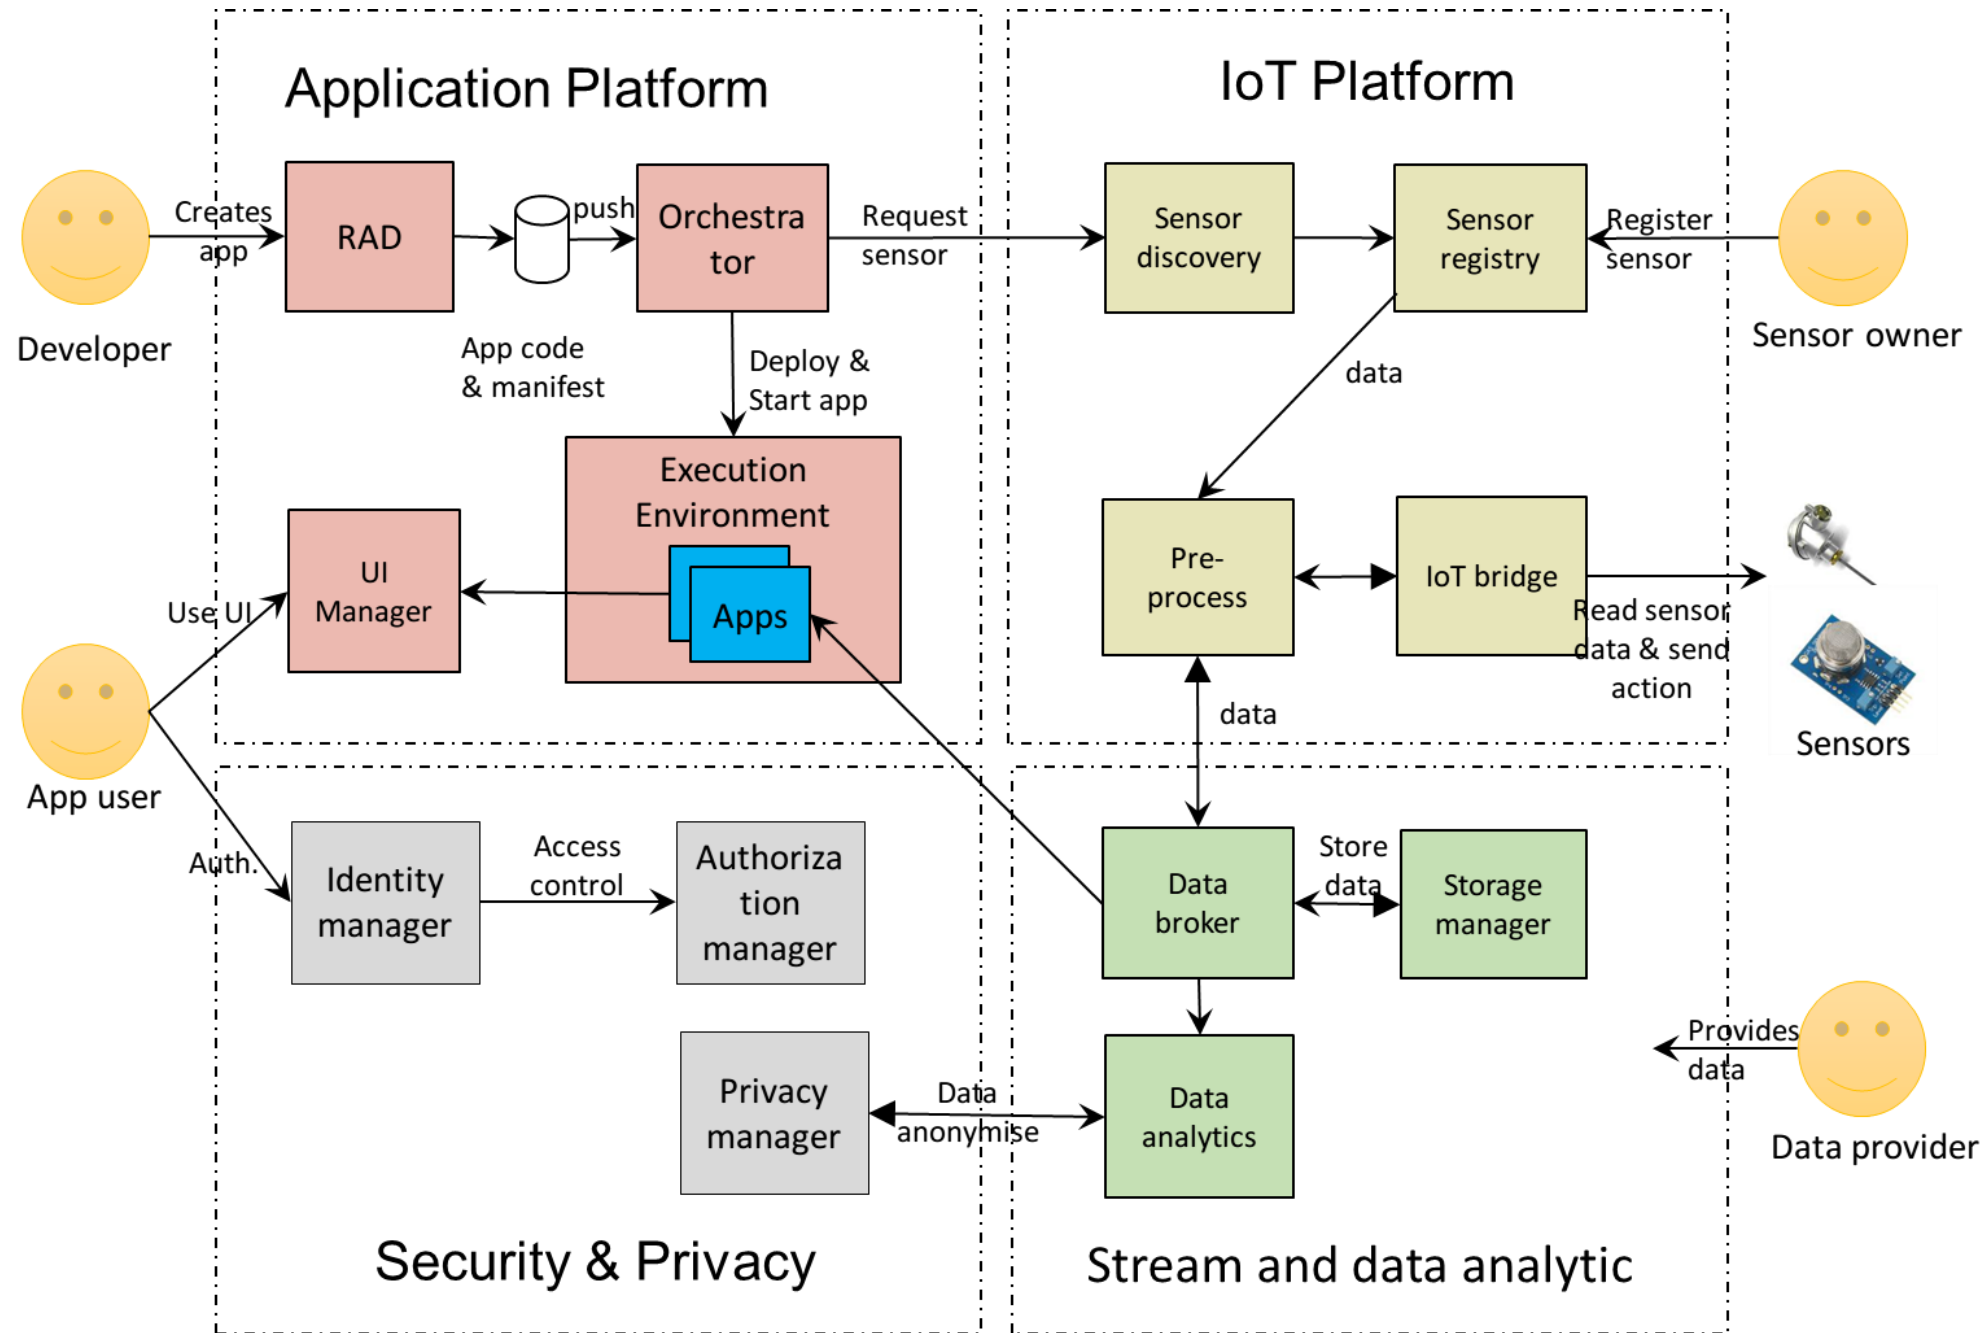

- Monitoring devices and systems, users notification
- Controlling and actuation of the systems and devices

## □ Big data applications

- Descriptive analytic
- Prescriptive analytic/recommendation
- Predictive and forecasting

# Complementing EU-African partnership

**Technology provider and know how**  
*(5 partners: SMEs, university and research organization)*

**Co-design, community building and exploitation**  
*(7 partners: SMEs, Start-up, incubator, maker-space, universities)*
