

# How Smart mobility modes will really change everyday life?

Eric LEGALE, Issy Média

S8: Smart City & Region

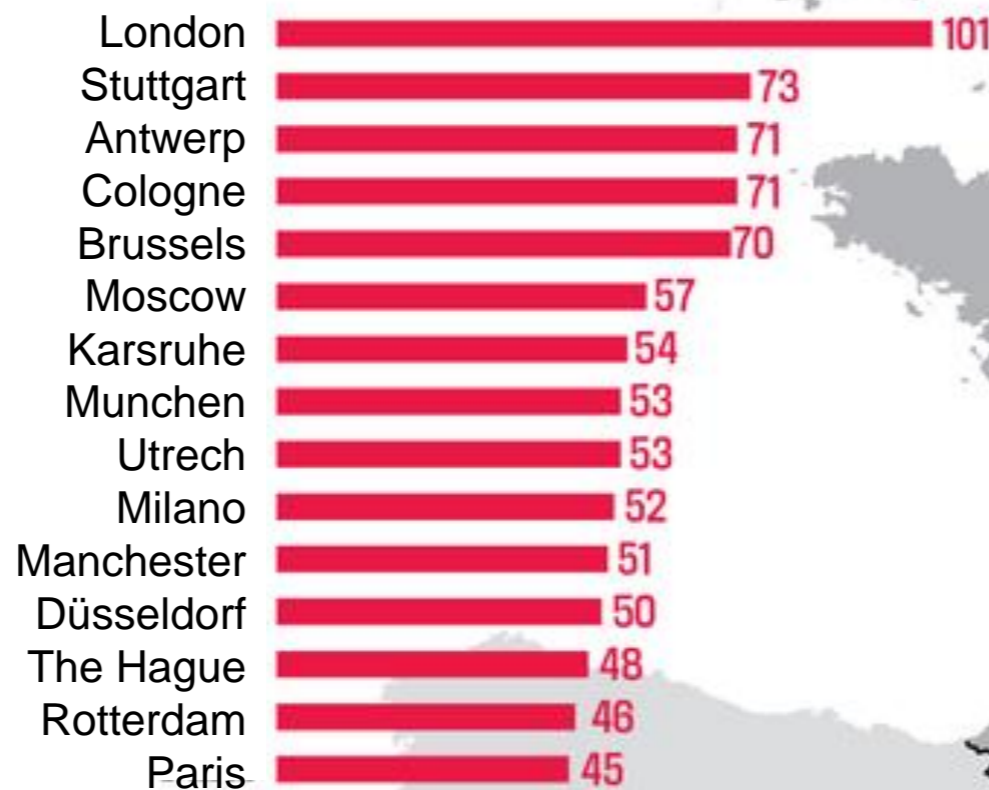

How “smart  
mobility” modes will  
really change today  
citizens’ everyday  
life and habits?

Monday 19th & Tuesday 20th  
September 2016

Evoluon Center, Eindhoven, Netherlands

**The most congested cities in Europe in 2015  
(number of hours lost per year)**

\*et sa banlieue. Source : INRIX

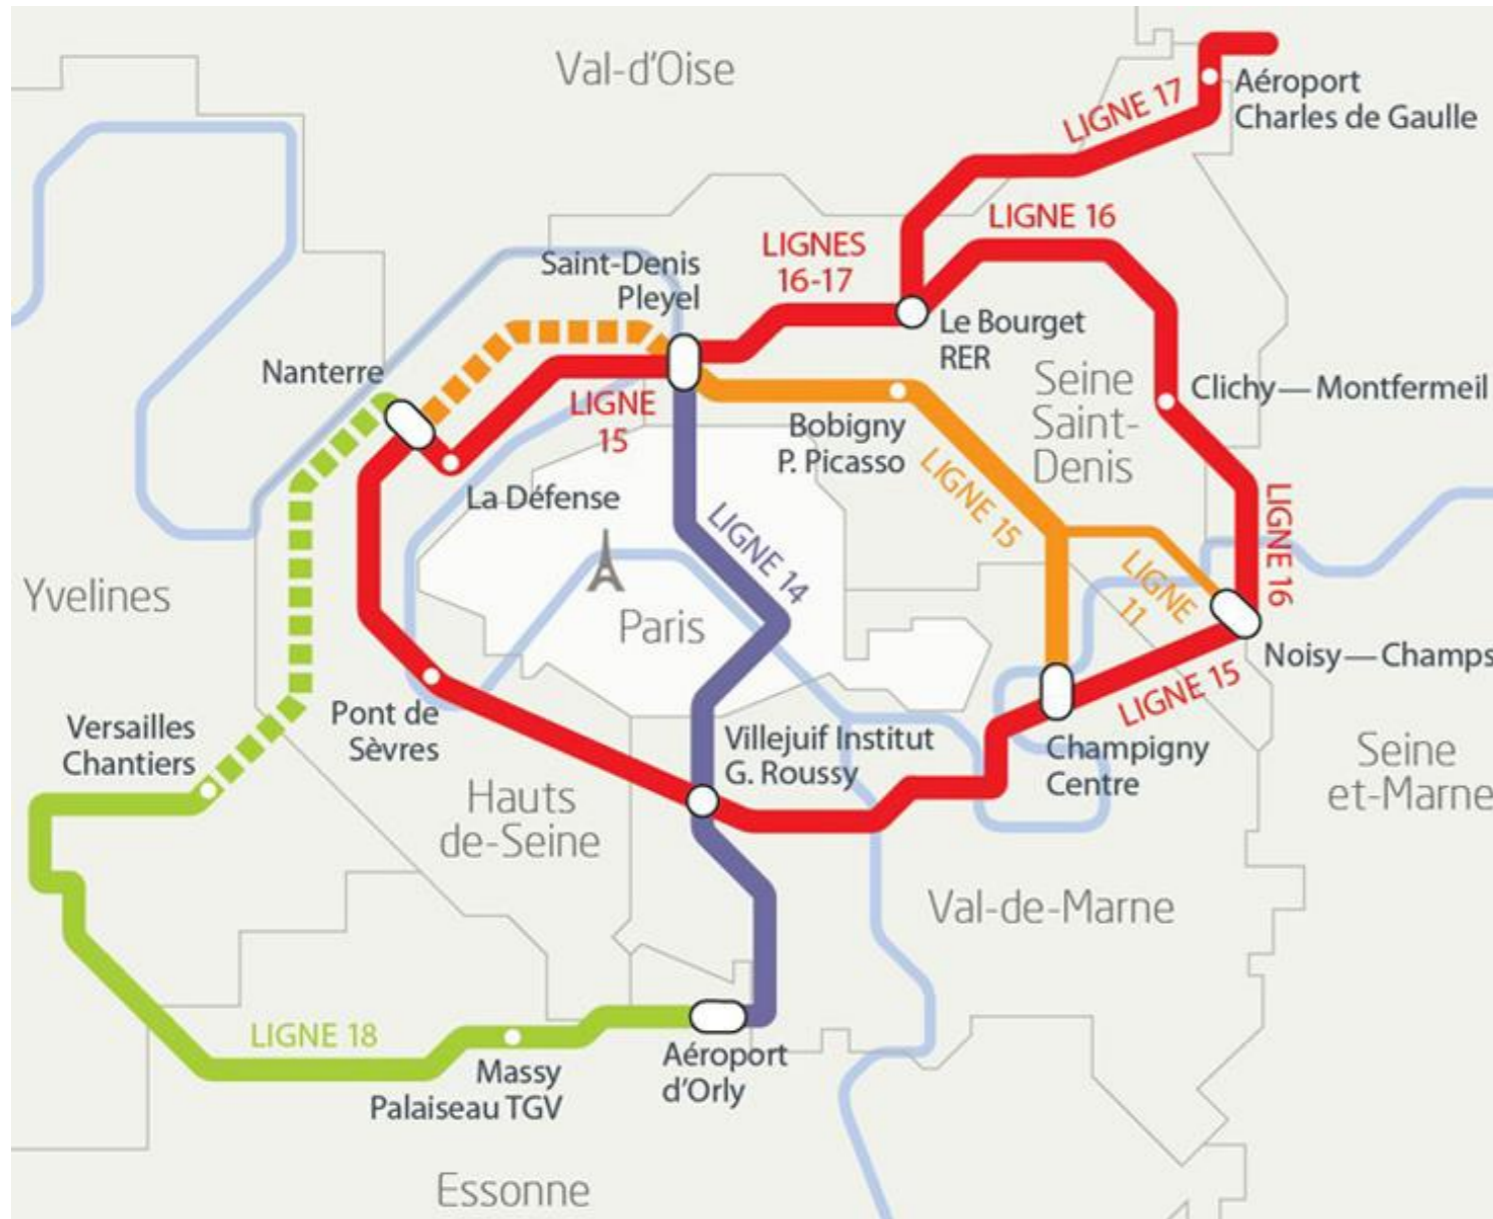

**Smart city projects  
represent a great  
opportunity to move  
forward**

## **GRAND PARIS EXPRESS**

New automated metro lines  
for more than 200 Km and  
68 new stations to be built by  
2030

The first works starting from  
South Paris (Issy-les-  
Moulineaux)

# it's not just a technical challenge

- 1. Reducing Traffic Jam thanks to Big Data?**
- 2. Making easier parking with smartphones?**
- 3. Changing behaviours with real time multimodal information?**
- 4. Changing the City with nex transport modes?**

Thank you for your attention
