Beyond just congratulate you for the very nice quality of the organization, I do not dare to imagine the scale of the task for the preparation besides the energy spread behind the scenes. In all sincerity, I really appreciated a lot the quality of the people that I was able to meet thanks to you. There is a "functional" quality, the one who pragmatically allows to envisage, to do concrete things beyond the Forum. And then there is a human quality, the one thanks to which was born the pleasure of the good company. A conviviality that I savored, a "spirit of the party" which results largely from your personalities.

Thus obviously, bravo to both and to those who surrounded you for this success!

Among the people I met, we plan to develop relations.

Yannick Fourastier, Innovation manager, Industry design & cybersecurity, Airbus Group Innovation

It was a great pleasure to once again see you amongst the global thought leaders at this year's Global Forum. As we discussed, it is very hard in my new role to attend events like the Global Forum, let alone to bring a global delegation. Still, I do not know of any other event that attracts such high caliber global representation, whilst providing such comprehensive real time insights into the innovation trends that are changing our society.

I am struck all over again by just how unique the Global Forum truly is. In an age of information overload and clutter, the consistent caliber of the speakers and timely content truly stands out. I'm looking forward to seeing you again next year
