

Example of a needed new smart pathway:

a better coordination of health and social
services for fragile persons at home

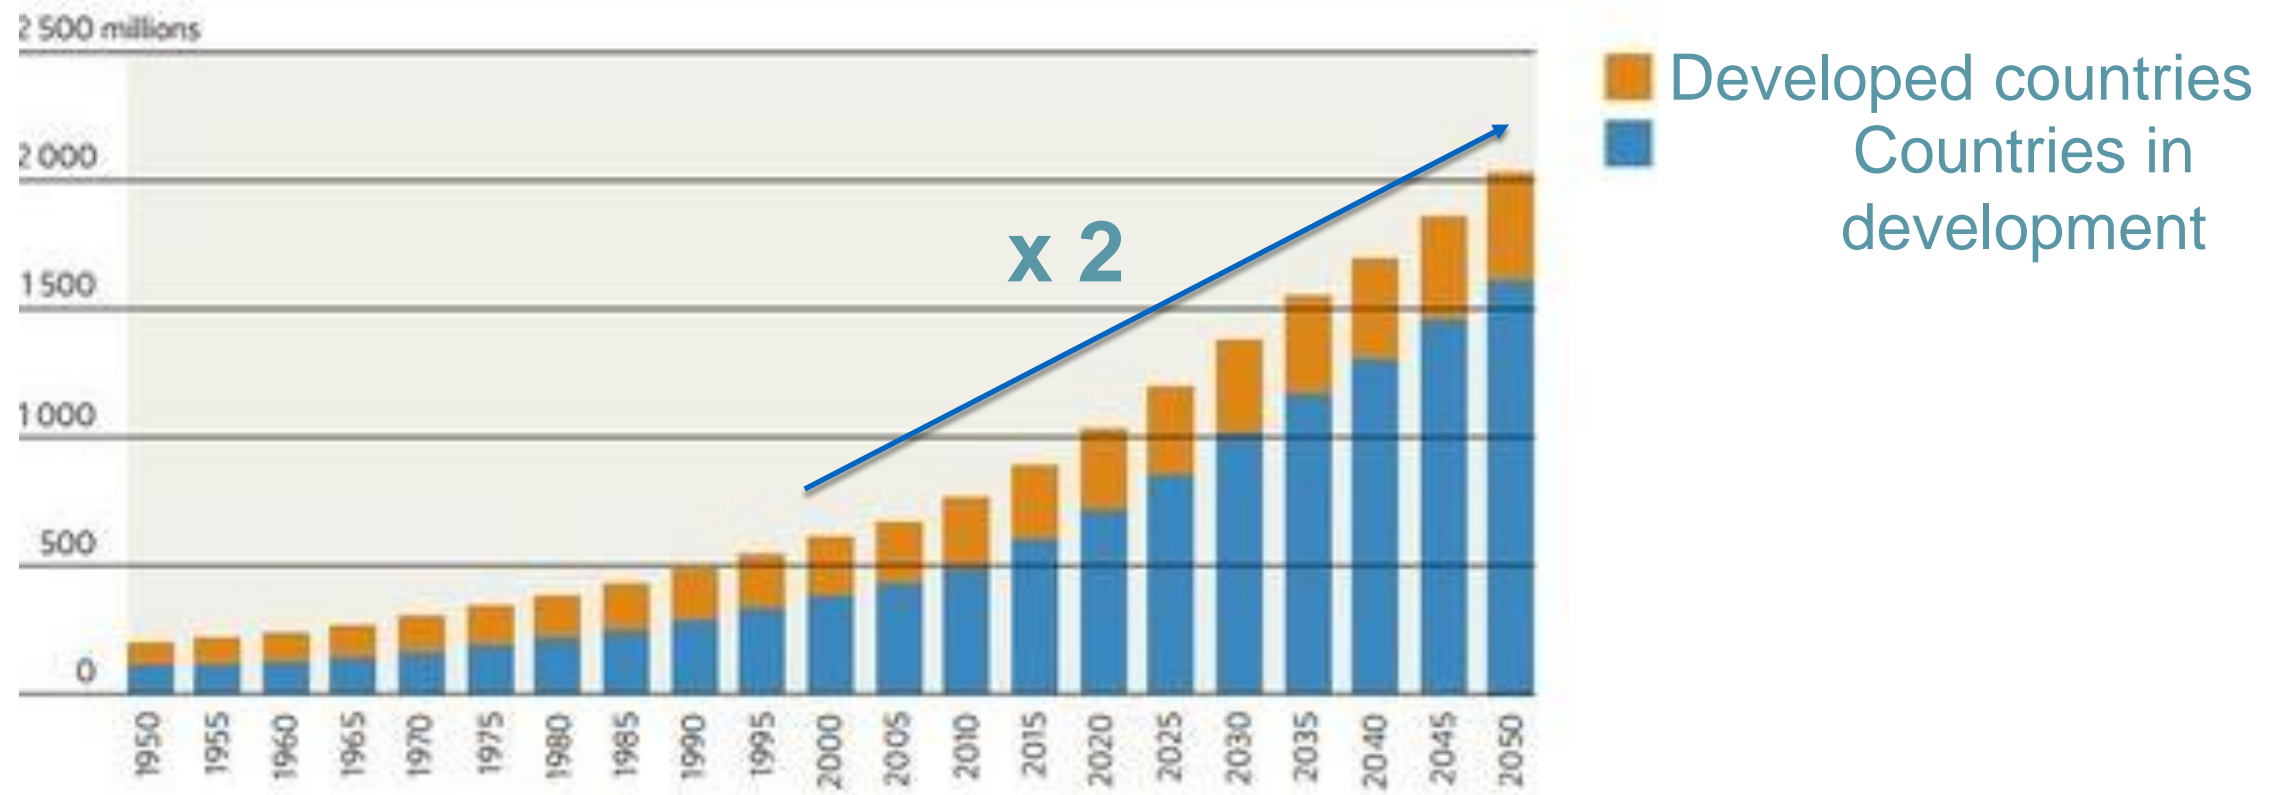

**Hoa Ora : health companion in
Maori/Tahitian**

Social demography

Number of elderly persons (> 60 years) in the world (1950-

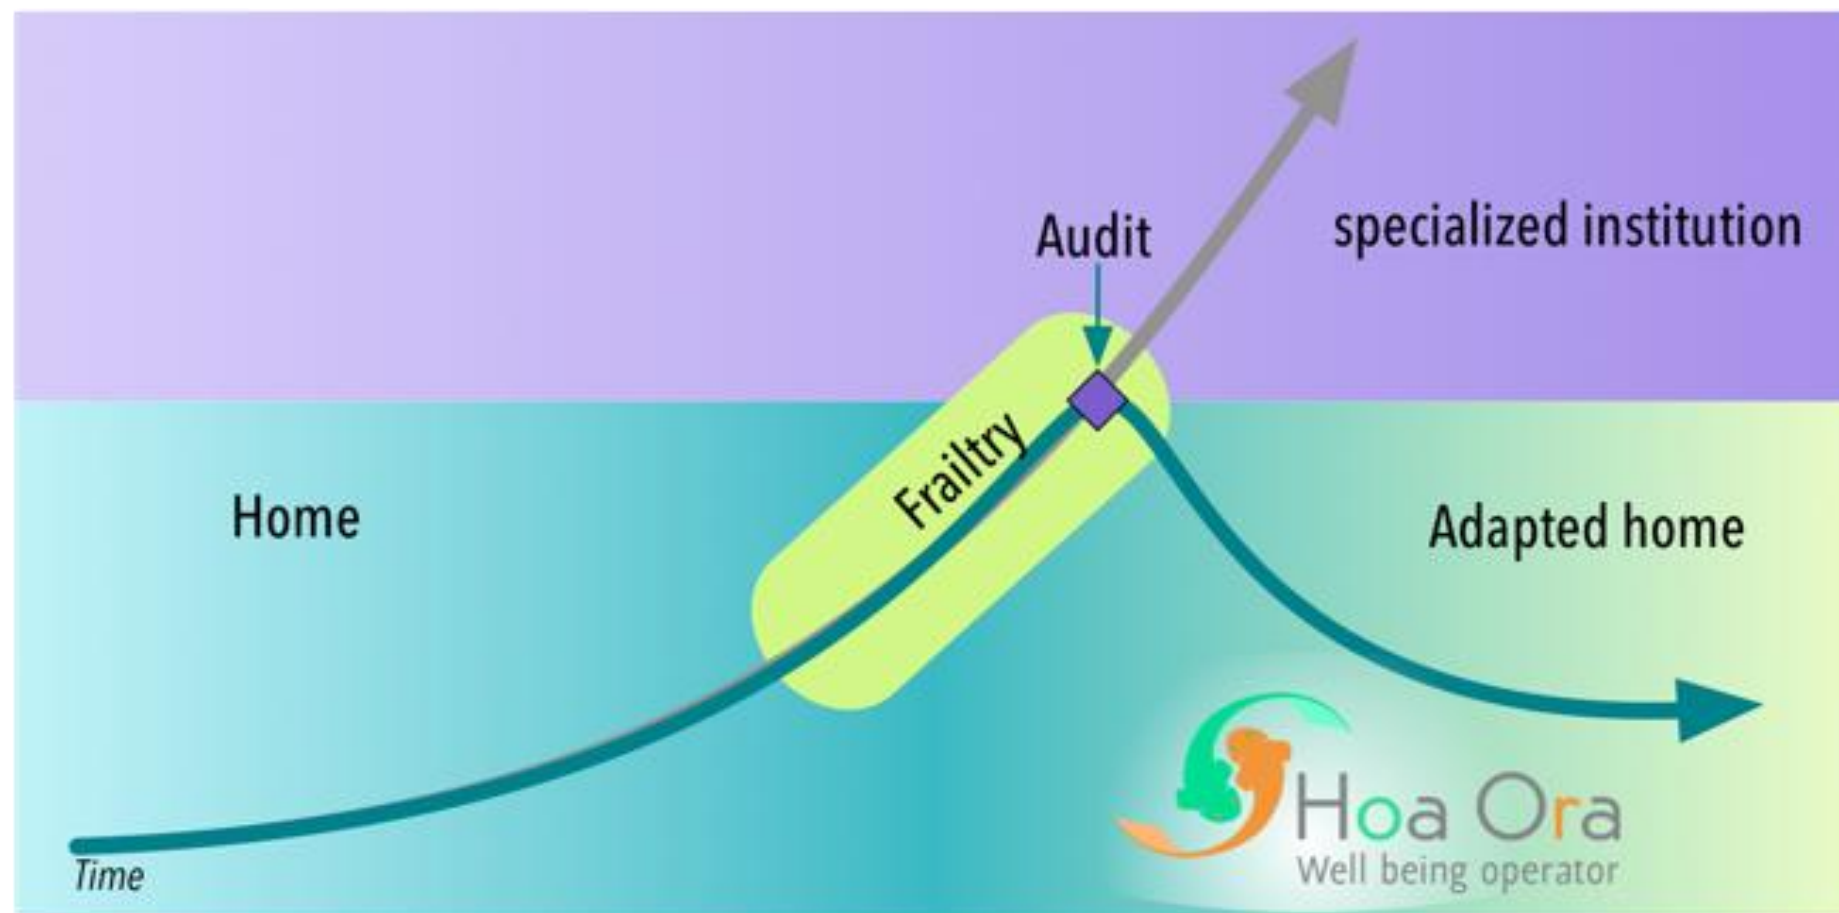

Between 2000 et 2050 : pop > 60 years will **double**
From 11% to 22% of the world's population

Title Text

Social conditions

80-90% of people want to live better and longer at home

Title Text

A dilemma to solve

1/2 over the age of retirement
are not receiving **any pension**
(International Labor Organization)

5-7% > 65 years are in institutions
(hospitals, elderly homes, living facilities....)

-> **Cost: 1,5 x the annual GDP per capita**

(e.g. 44 000 € per person in France)

Help services are used by 5-17% of the population

-> **Cost: 10 to 50% of per capita income**

e.g. 1/10 French is able to finance the loss
of autonomy of his parents

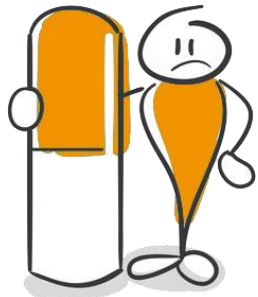

Sources : OECD, NSEE, OCIRP, survey Opinion Way / AG2R – juin 2016

Winnipeg, Canada

And a second dilemma

48 % of caregivers
report chronic illness

1/3 caregivers
die before
the helped person

75% of
caregivers feel
stressed or overworked

226 km of average distance
between the caregivers and
the helped person (in France)

Barriers to good aging at home

Public authorities

- Heavy financial burden
- Low quality control
- Complexity and fragmentation of financial aids

Service providers

- Inadequacy between training and needs
- Difficult quality control
- Small and unprofitable actors
- Difficulties in coordination between providers

Title Text

Seniors

- Complexity and illegibility of aids
- Managing the multiplicity of stakeholders
- Amount of the remain costs

Families

- Guilt
- Cohabitation with service providers
- Financial participation
- Stress and absenteeism at work
