The five Year near-term actions

- **Build a new social contract for the digital age**, which addresses individual rights, justice and equity, inclusive access, and environmental sustainability;
- **Ensure open and transparent access to data and knowledge** critical to achieving sustainability and equity;
- **Foster public and private collaborations** to develop and manage AI and other technologies in support of sustainability and equity;
- **Promote research and innovation** to steer digital transformations toward sustainability and equity; and
- **Support targeted communication, engagement and education** to advance the social contract.
