

Circularity and Unconventional Water Resources

Professor Rajamohan
Faculty of Engineering
Sohar University, Oman

Muscat, Oman, October 19th, 2022

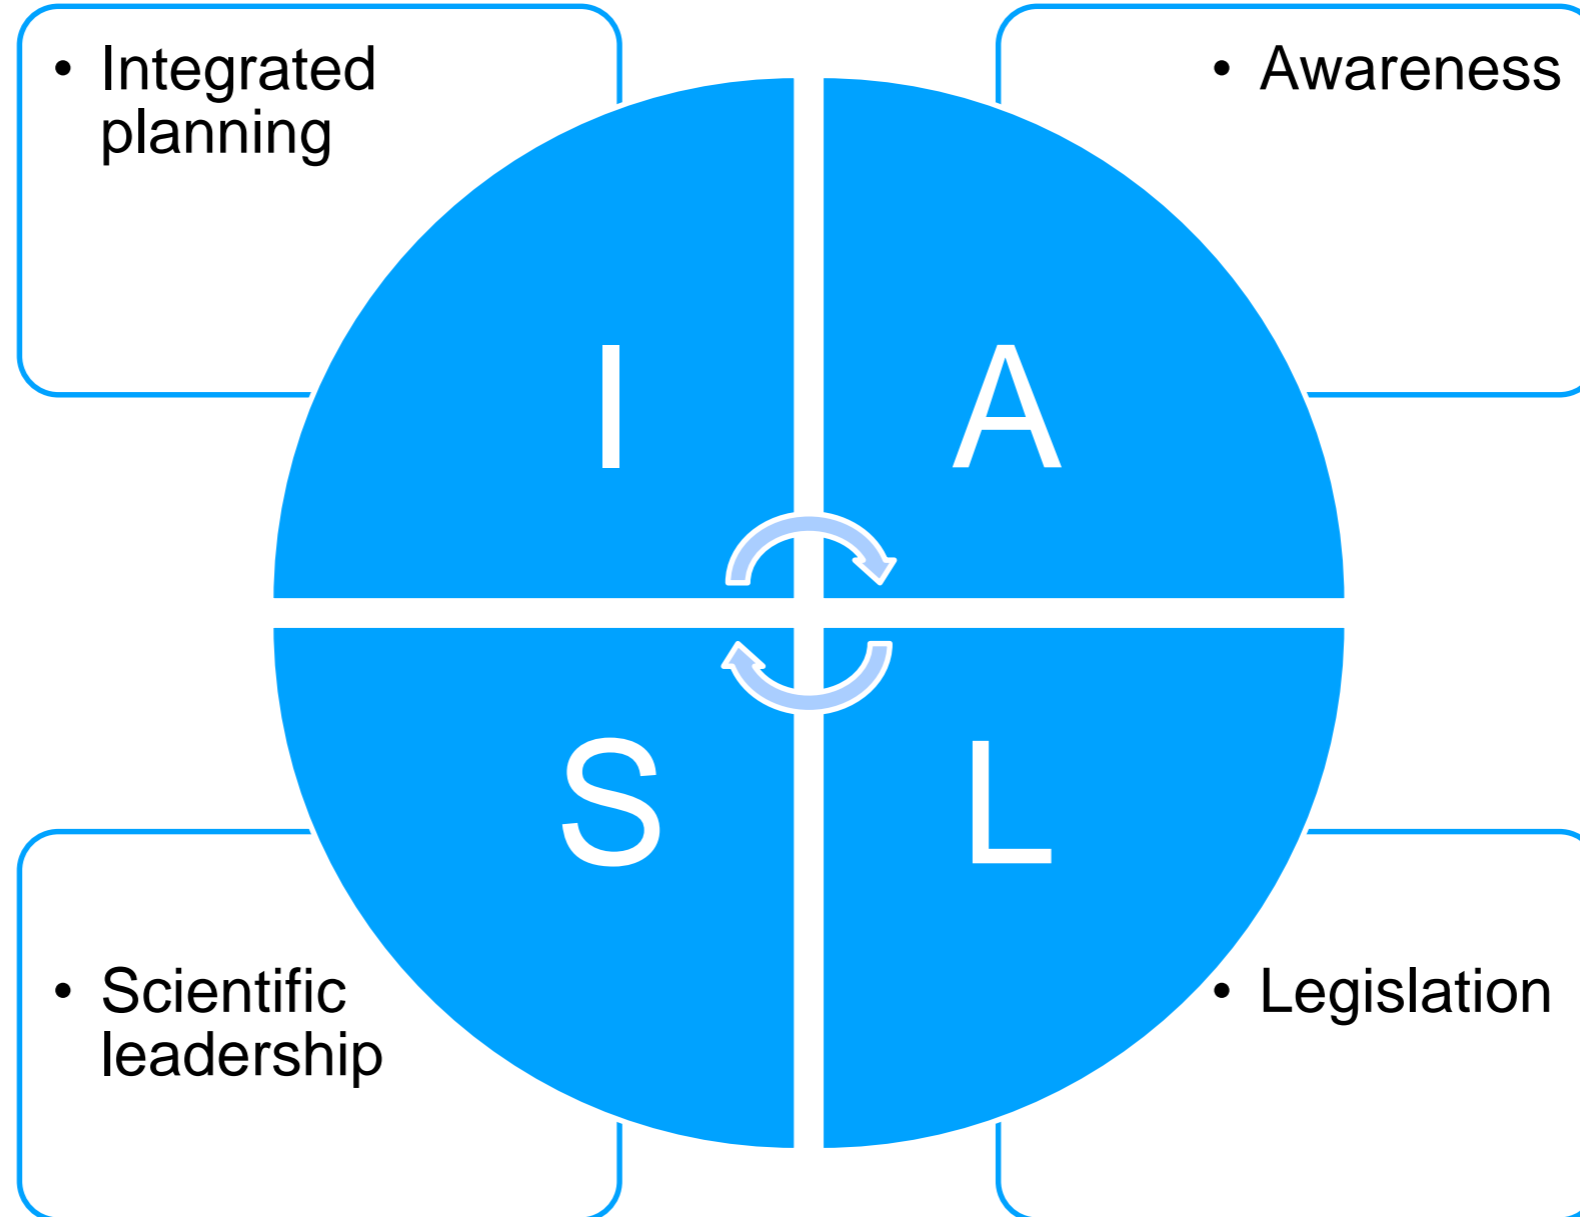

Challenges in Oman

- Fast depletion of underground water
- Increase in salinity
- Irrigation needs
- Water supply- Demand gap
- Urban population growth
- Diversification of economy

Potential opportunities

- Reuse and recycle of water
- Desalination reject - reuse
- Industrial waste water reuse
- Zero discharge
- Circular economy

IWRM

Circularity and Unconventional Water Resources
