P4 MEDICINE:

PREDICTIVE

Genetic risks for many diseases are identified. Signs of illness are recognized, before it manifests. The effects of disease are known and planned for in advance.

The focus of care is on the individual and how to optimize wellness by predicting disease and personalized treatments to prevent it.

M

P4

Individuals are given the tools to recognize the earliest signs of disease, when it's most reversible.

Individuals are well informed about their health and better prepared to make their own health care decisions. This makes medicine far more efficient.

XSUN - Guérande Creation : 2016 Employees : 9 DAVID Benjamin www.xsun.fr

XSun explores the future with autonomous drones in energy and decision. The successful marriage of new technologies and renewable energies (eg solar) is an immense source of solutions. SolarXOne, 1st drone model designed and manufactured by XSun, is an achievement of this union.
